

The background of the entire poster is a photograph of a wetland or coastal area. In the upper half, there's a body of water with green reeds. In the lower half, a person wearing a purple long-sleeved shirt and a traditional conical hat is in a small blue boat, bent over and working with the mud or water. The overall scene is a mix of blue, green, and brown tones.

INTERNATIONAL PANEL ON DELTAS AND COASTAL AREAS

Official Launch at the UN 2023 Water Conference

Thursday March 23, 18.30-19.45 EST

***United Nations Headquarters
Interactive Dialogue Room (CR4)***

Deep-Dive Event: Science-Policy

Friday March 24, 9.00-11.00 EST

NY Water Week - Water House

666 Third Avenue, 21st floor

A unique partnership

Deltas, coastal areas, and islands are our homes. Nearly 40% of the world's population lives within 100 kilometers of the coast.

But climate change puts livelihoods, communities, and biodiversity at risk. Action on the ground is impeded by fragmented approaches, and a lack of capacity and knowledge.

The IPDC is a unique partnership bringing together policymakers, financial institutions, scientific experts, and practitioners from around the world.

Mobilizing political will and uniting leadership

Accelerating investment by providing the supporting evidence

Sharing knowledge between scientists and experts

Translating IPCC climate scenarios to show impact at national level

Building capacity for practitioners to accelerate action on the ground

How?

Supporting global leaders

This partnership allows us to solve complex problems together, to create sustainable environments, and to build resilient societies and green economies.

The IPDC supports global leaders in achieving these goals by:

- Providing tailored solutions for policymakers, supporting climate adaptation strategies, and advising on future climate impacts
- Supporting financing and implementation of adaptation solutions by linking to international financial institutions and donors
- Empowering local actors through capacity-building, sharing solutions and best practice between member countries

The IPDC looks to work in partnerships with organizations from around the world in support of these goals

JOIN US !

The IPDC was founded by the Netherlands Ministry of Infrastructure and Water Management, Deltares, the Global Center for Adaptation, and the Delta Alliance.

We cannot do it alone.

**Join us, and help save the world's
deltas, coasts, and islands.**

First IPDC Conference

March 2024

The Netherlands

SEE YOU NEXT YEAR!
